

Food waste, not in good taste .

What can we do to stopp the food waste ?

What do we have to change?

- We can only buy as much as we eat
- We should not leave any leftovers
- We can preserve leftovers
- Rely on your senses after the best bevor date
- Join foodsharing
- Tell your friends and family

THINK•EAT•SAVE

WHY IS THIS SO IMPORTANT

Only in Germany are wasted . On a ranking we are on 8.place with the most wasted food **in the world** .

Waste at a glance

One person in Germany is wasting on average **75kg** per year .

And that's how it looks like ...

- 12% on drinks
- 13% on bread
- 4% on meat & fish
- 9% on milkproducts
- 6% on canned goods
- 35% on fruits & vegetables
- 21% on others

Most of this waste comes about buying to much food and leave the most of it .

JUST EAT IT

*There is food for everyone in
this world, but not everyone
eats.*

We need to stopp it Now!

Eat to live , don't live to eat !

The biggest problem about food waste is that we don't have to bear the consequences.

When we are wasting food there are others that don't even have the chance to eat to survive.

With our video and this brochure we want to draw some attention on the topic of food waste .

We can only make a change if everyone is taking a part of the project .

And it's not that hard to make a change if everyone in shopping a little bit more consciously

For a better future

Especially homeless people would appreciate it when we would give our leftovers to them instead of throwing it away.

You need to see the situation in other countries

When you see countries like Africa, where people don't have enough food to survive, there comes the question **why**.

There is enough food for **everyone** in the world!

But the sad truth is that the food is not shared fairly .

We are eating more than enough and throwing the rest of it in the trash .

And they don't have enough to survive.
